

The National Dropout Prevention Center for Students with Disabilities
is pleased to announce

A Free Online Discussion:
Dropout Prevention and Youth with Disabilities:
What the Research Says Really Works!

Presenter:

Dr. Brian Cobb

Professor in the School of Education & Associate Dean for Research for the College of Applied
Human Sciences at Colorado State University

May 25, 2006 - June 8, 2006

From May 25th through June 8th, please join Dr. Brian Cobb for an online follow up discussion to the May 25th Web Seminar, **Dropout Prevention and Youth with Disabilities: What the Research Says Really Works!** The online discussion is open to all, and will provide Web Seminar participants with an opportunity to discuss their questions and concerns with Dr. Cobb and colleagues from across the country.

The May 25th event will examine a variety of questions, including: What works in dropout prevention for youth with disabilities? How do you know for sure? Dr. Brian Cobb has used rigorous standards for scientifically-based research written, over the past two decades in the United States and other English-speaking countries around the world, to separate the 'wheat from the chaff' on this topic. In this Web Seminar from the National Dropout Prevention Center for Students with Disabilities, Dr. Cobb will provide us with insights from the past five years of research synthesis, examining instructional interventions that help prevent secondary-aged youth with disabilities from dropping out of school or engaging in activities that correlate highly with dropping out. Join us to learn about the results of his work in examining reliable evidence-based practices and ways to implement them.
