

The National Dropout Prevention Center for Students with Disabilities  
is pleased to announce . . . .

**An Online Discussion**  
**Effective Approaches to Increasing Graduation Rates for  
All Students**

*Featuring:*  
**Dr. Camilla Lehr**  
**Institute on Community Integration**  
**University of Minnesota**

**October 5, 2005-October 19, 2005**

From October 5th through October 19th, please join Dr. Camilla Lehr for an online follow up discussion to the October 5th teleseminar, **Effective Approaches to Increasing Graduation Rates for All Students**. The online discussion is open to all, and will provide teleseminar participants with an opportunity to discuss their questions and concerns with Dr. Lehr and colleagues from across the country.

State and local education leaders are faced with the challenge of raising rates of successful school completion for all students, including students with disabilities. This online discussion will provide an opportunity to learn more about effective programming at universal, selected, and targeted levels to decrease the numbers of students leaving school without a diploma. Topics of discussion include research-based answers to questions about who drops out and why, the best way to address the dropout problem, and key components of dropout prevention programs.

**To participate, please visit our website at:**
